

Reduce
the Risk
of Injury

with Smart-Rider

'Escape' Breakaway Stirrups

The thought of being dragged by a panicking horse is every rider and parent's nightmare and it happens all too frequently.

Our Smart-Rider Breakaway Stirrups have been designed to ease that fear of being dragged while riding.

A two part stirrup that disengages, setting the rider free when in a position of danger!

Doubles as a stirrup extender!

Our Smart-Rider Breakaway Stirrups provide a plausible alternative to standard stirrups because they are designed to actively breakaway and release your foot should you fall off, reducing the risk of injury from being dragged.

Made from a high tech light weight material, our breakaway stirrups are practical, durable and add confidence to the rider knowing that you have a greater chance of your foot being released if you fall from your horse. The innovative design also doubles as a stirrup extender for those who need that little extra help mounting.

This a piece of equipment **EVERY HORSE RIDER MUST HAVE**

Research has shown the majority of serious falls resulting in head injuries, come from stirrup hang ups. The rider got hung up long enough to get spun around and have their body swung under the horse, exposing the head to the horse's hind legs. The hind legs offer the greatest risk in a dragging because the body is totally exposed. One step or kick from a 1200 lb. horse, can do extensive damage. At Saddlemart we are all about safety and encourage EVERY rider, whether Western or English to wear and approved riding helmet.

Available
in a variety
of colours,
tensions,
and
accessories
